

CPSC's eFiling

Streamline CPSC Compliance with OnRule's Automated eFiling Solution

Ensure seamless compliance with the Consumer Product Safety Commission's (CPSC) electronic filing requirements using OnRule's intelligent automation platform. Our system captures & transmits all mandated data attributes with precision, helping importers of regulated consumer products reduce risk scores & accelerate shipment clearance by minimizing delays and import examinations at U.S. ports of entry.

Regulatory Background

The CPSC mandates that importers of regulated consumer products electronically submit specific data elements related to Certificates of Compliance (CoC) through U.S. Customs and Border Protection (CBP). This includes both the General Certificate of Conformity (GCC) and the Children's Product Certificate (CPC).

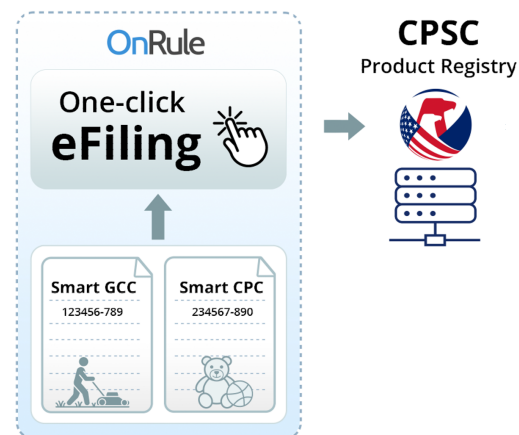

Implementation Challenges Faced by Importers

- **Complex Implementation:** Launching a company-wide eFile initiative demands significant time and resources. Understanding regulatory requirements, developing an implementation roadmap, and executing the program require meticulous planning and dedicated effort.
- **Legacy Product Data Bottlenecks:** Digitizing and eFiling CoCs for products already in production and importation is a substantial undertaking, requiring careful organization and data management.
- **Ongoing Updates:** Any changes to CoCs—due to product modifications, updated test reports, or factory changes—necessitate timely eFile updates to new versions to maintain compliance.

Benefits of OnRule's Comprehensive Solution

OnRule simplifies and scales the eFiling process through its automated software, expert support and professional services:

- **One-Click eFiling:** Instantly eFile CPSC-mandated data for over 120 regulated consumer product categories.
- **Smart CoC Generation:** Automatically create Smart GCC and CPC for new products, ensuring effortless compliance.
- **Legacy CoC Digitization:** Convert and eFile existing CoCs for products currently in production and being imported.
- **Advanced Features:** Automated notifications, version control, bulk eFiling, and broker collaboration capabilities.
- **Rapid Deployment:** Prepare and file CoCs for upcoming shipments with minimal lead time.
- **Document Accessibility:** Instantly access and share supporting documentation with internal and external stakeholders.
- **Risk Score Reduction:** Lower your CPSC risk score through accurate, timely, and complete data submissions leading to fast customs clearance and fewer inspections.

Partner with OnRule for a seamless, scalable, and compliant eFiling experience.
